BUSINESS
WITH

 begreenlegal

Experienced and Trustworthy Guidance in a Pioneering Industry

BeGreenLegal comes from both outside and inside the cannabis industry. Outside, our consultants have provided expert advice and consulting services for obtaining land use permits, environmental permits, and business licenses to public and private sector residential, commercial, and industrial clients for a combined 45 years at a fraction of traditional consulting costs. Inside, we have learned through operating our own cannabis business how to effectively apply this same expertise to obtaining cannabis-related permits and licenses. We emphasize a strategic approach that saves time and money, while avoiding or at least minimizing project delays. Our clients come back to us because they are pleased with the quality of our work and have obtained their approvals so they can run their business and money, while creating better projects.

Every Good Plan Starts with Discovery

How you prepare for your cannabis business license will greatly affect your success in obtaining one. There are many steps to licensure, but the good thing is you now have a reliable consultant to make sure you are ready. We can complete one or more of the following discovery modules to help you start your adventure.

Who We Help

With more than 7 years operating our own successful medical cannabis business, we are uniquely positioned to assist others in the supply chain:

Cultivators
Manufacturing & Testing Labs
Distributors & Transporters
Dispensaries
Ancillary Businesses

Regulatory Compliance

We have spent our careers helping ourselves and other businesses navigate the complexities of local and state regulatory compliance. Every business needs permits and licenses to operate and that is especially so with cannabis companies. You can rely on our expertise to help you obtain your approvals as quickly and efficiently as possible.

Property and Environment

As land use and environmental planners, we are experts at land development and assessing environmental constraints. Our experience in operating our own cannabis cultivation operations also make us uniquely qualified to assist other cannabis businesses with these same issues. Whatever your unique challenges are, we can help you with the following solutions.

Business and Operations

Does your business operate efficiently? Does your business plan offer projections for the next 18-24 months? Will a government agency issuing you a permit or license be convinced your business will be successful and a good neighbor? We can make sure your answers to these questions are a resounding 'Yes' by completing one or more of the following plans.
